

Digital Auction Rules

Lígalo En Línea — No-Clock Auction

MULTIPLY YOUR PASSION

1. Overview

The Digital Auction (Remate Digital) is an auction of the horses in a race **with no clock**. You buy a horse and it is yours as long as nobody bids more for it. Another user may take it from you by paying a higher price at any time before the race closes.

At closing, the final owner of the winning horse collects the auction prize. Unlike the Called Auction (Cantado), Remático and VIP Auction, there are no turns and no countdown: all horses are for sale at the same time.

2. Where and When

- The Digital Auction is available only on race days where the administration enables the **Remate** game.
- It opens as soon as the race has Dynamic Table prices loaded, without waiting for the 20 minutes before post time.
- It closes automatically when the race closes. The administration may also close it earlier.
- Once closed you can view the horses and their owners, but you cannot bid.

3. How to Play

- Open the **Remate** tab in the betting window and select the race.
- Each horse shows its current price and its owner: **Libre** (free), **TUYO** (yours) or the user who holds it.
- Tap **Tomar** (take) to buy a free horse, or **Quitar** (outbid) to bid on a horse held by another user.
- Enter your bid (the window suggests the minimum bid) and confirm. The amount is deducted from your balance at that moment.
- You may own several horses in the same race.

4. Starting Price

The starting price of each horse is calculated from its Dynamic Table price:

$$\text{Starting price} = \text{TD price} \times \text{Factor} \times 1.33$$

- The administration sets the Digital Auction factor (currently 10).
- The starting price can never equal or exceed the guaranteed prize: it is capped at 95% of the prize.
- Example: with a TD price of 0.02 and factor 10, the starting price is $0.02 \times 10 \times 1.33 = \text{USD } 0.27$.
- While a horse is free, its starting price may be updated if Dynamic Table prices change. Once it has an owner, its price only changes with a new bid.

5. Bidding

- The first buyer takes the horse at its starting price.
- To take a horse that already has an owner, you must bid at least the current price plus the **minimum increment**, which is 5% of the guaranteed prize.
- Example: with a USD 10.00 prize, the minimum increment is USD 0.50.
- You cannot bid on a horse that is already yours.
- No bid may equal or exceed the current auction prize.
- You must have enough balance to cover the full bid.
- When another user outbids you, the **full amount** you paid for that horse is refunded to you immediately and automatically.

6. Prize

- Each race has a **guaranteed prize** equal to the Digital Auction factor (with factor 10, the guaranteed prize is USD 10.00).
- If sales grow, the prize grows. The prize is the greater of the guaranteed prize and the pool:

Prize = the greater of (Guaranteed prize) and (Total sold × 80%)

- 20% of total sales is the house commission (takeout). The administration may adjust this percentage per race before sales open.
- The betting window always shows the current prize.

7. Winner and Payout

- The winner is the final owner of the horse that finishes first according to the official result.
- The prize is credited automatically to your balance once the result is official.
- If the winning horse has no owner at closing, no prize is paid.
- All other sold horses are settled as losers, and the amounts paid for them are not refunded.

8. Dead Heats

- If there is a dead heat for first place, the prize is split in **equal shares** among the winning horses **that have an owner**.
- If only one of the tied horses has an owner, that owner receives the full prize.

9. Scratched Horses

- If an owned horse is scratched, the owner is automatically refunded the **full amount** paid, and the horse is removed from the auction.
- A scratched horse cannot be bought or bid on.

10. Cancelled or Postponed Races

- If the race is cancelled or moved to another day, the Digital Auction is voided and each owner is refunded the amount paid for their horses.
- A pending or under-review official result is not a cancellation: settlement waits for the official result.

11. Multi-Currency

- USD is the internal base currency. Prices, bids and prize are set in USD.
- If you play in another currency, the window shows amounts converted at the current rate, and your bid is converted to USD when you submit it.
- Refunds return the same USD amount you paid.
- VES, COP, DOP, EUR and other currencies enabled on the platform are accepted.

12. Visibility

- The Digital Auction is an open auction: all participants see the current price of each horse and the username of its current owner.

13. Loyalty Program (Ligalo Points)

- In auctions, Ligalo Points (LP) are awarded only to the **final owner** of each horse at closing, at the Loyalty Program rate in effect.
- Outbid and refunded bids do not earn LP.
- LP count toward your VIP level and can be redeemed under the Loyalty Program rules.

14. General and Important Rules

- Amounts are handled in US dollars (USD) as the base currency. Multiple currencies are accepted with automatic conversion.
- Multiple accounts are not allowed. The platform reserves the right to cancel suspicious bets.
- Persons under 18 are not allowed to take part in real-money games.
- Lígalo En Línea reserves the right to modify these rules at any time. Users will be notified of changes.
- In case of any dispute, the decision of the Lígalo Internacional administration is final.

15. Contact and Support

- Website: ligalocontodo.com
- Email: info@grupoligalo.com
- Phone: +1 829 518 7047
- To report technical problems or inappropriate conduct, contact support through the messages section of your account.

These rules may be updated periodically. The current version is always available in the Rules section of the platform.
