Super 6 Rulebook

The horse racing jackpot pool

LigaLoContodo · Version 1.0 · July 2026

1. Game Description

Super 6 is a jackpot-style pool game in which the player must select the winning horse of 6 consecutive races designated by LigaLoContodo. These races may belong to one or several tracks in the daily program. Each ticket represents one or more valid combinations of selections.

2. Ticket Purchase

Tickets are sold at a fixed cost per combination set by LigaLoContodo (e.g. \$1.00 USD equivalent in your local currency). If the player picks several horses in a leg, the number of combinations is multiplied. Formula: combinations = horses leg₁ × horses leg₂ × ... × horses leg₆.

Multi-currency: tickets are displayed and charged in the player's preferred currency. Internally the pool is administered in USD to guarantee transparency and fairness across all players.

3. Sale Closing

Sales close whichever comes first:

- the official post time of Leg 1, or
- when Leg 1 changes status to "in progress".

After closing, no more tickets or modifications are accepted.

4. Prize Structure

Every Super 6 sequence has an initial guaranteed prize plus any previous rollover (when the previous sequence had no 6/6 winner). The house retains a takeout from total sales, and the excess over the guarantee is distributed between the 6/6 pool and the 5/6 consolation pool.

4.1 Official Formulas

Guarantee = initial prize + previous rollover

Net = total sales × (1 – % takeout)

Excess = MAX(0, Net – Guarantee)

6/6 Pool = Guarantee + Excess × (1 – % consolation)

5/6 Pool = Excess × % consolation

The 6/6 pool never falls below the guarantee. If sales don't cover it, the house assumes the shortfall. Only when the net exceeds the guarantee does the 6/6 pool start growing and the 5/6 pool start forming.

5. Winner Determination

After each race, the system processes the official track result:

- Hit: at least one selected horse in the leg was declared the official winner.
- Miss: none of the selected horses won — the ticket is eliminated from the 6/6 pool.
- Void: if the race is cancelled or the selected horse is scratched, the leg is voided and does NOT count as a miss.

5.1 Live Combinations

After each finalized leg, surviving combinations are recomputed as:

```
live_combinations = previous_live_combinations × (winning_horses_in_leg /  
selected_horses_in_leg)
```

6. Payouts

6.1 Jackpot (6/6)

If one or more tickets hit all 6 legs, the 6/6 Pool is divided equally among the winning combinations. The dividend is paid in USD and credited to the player's balance converted to their currency at the current exchange rate.

6.2 Consolation (5/6)

If any tickets have exactly 5 hits (and none with 6), they receive the 5/6 Pool divided proportionally among their live combinations.

7. Rollover

If no ticket hits the 6 legs, the entire 6/6 Pool (guarantee + assigned excess) carries over as previous_rollover to the next Super 6 sequence. There is no cap in days or amount for the accumulation.

8. Refunds

If the entire sequence is cancelled (e.g. fewer than 4 legs with valid races), the system refunds 100% of the wagered amount to the player's balance in their original currency. No takeout is charged on refunded sequences.

9. Public Listing

LigaLoContodo maintains a live public listing of all tickets that opted in for visibility. The listing shows the player alias, live combinations count, partial hits, and status. The player may opt out of visibility at the time of purchase.

10. Restrictions

- Only users with the SUPER6 permission active in their profile may participate.
- The player's balance must be sufficient to cover the full ticket in USD.
- LigaLoContodo reserves the right to cancel bets placed due to programming errors or disputed results.
- Official track decisions are final and are the sole source of truth for settlement.

11. General Provisions

This rulebook is part of the LigaLoContodo Terms and Conditions. Any situation not covered here will be resolved by site administration, seeking balance between what was wagered and the player's interest. Future changes will be communicated through site publication and updates to the current PDF.
